Floor-Ox is a floor treatment used to prevent slipping on production floors in meat, poultry, dairy and general processing plants. It contains sodium percarbonate which makes it an effective odor control agent in moist environments, such as floors, drains and any other non-food contact surfaces. When activated, Floor-Ox generates hydrogen peroxide to accelerate activity.

**DIRECTIONS FOR USE:** Apply in thin layer on food plant flooring, either manually or through the use of a drop spreader. Application rate of 10 lbs. per 3750 sq. ft. will deliver an effective level of odor control and prevents slipping of personnel on production floor.
