IF SWALLOWED: Call a POISON CENTER or doctor if you feel unwell. Rinse mouth. DO NOT induce vomiting.

**Storage:** Store locked up.

**Disposal:** Dispose of contents/container to an approved waste disposal plant.

Additional Precautions: Corrosive! Contains sulfamic acid. Do not mix with alkalis or other incompatible materials.

Read SDS before using this product.

## **SULFAMIC ACID CLEANER**

KC-430 is a powdered sulfamic acid based cleaner, easily soluble in water. Sulfamic acid is very effective at removing rust, lime scale and other inorganic soils. Its low volatility, low corrosivity, and low toxicity make it safer to handle than hydrochloric acid.

**DIRECTIONS FOR USE:** Dissolve 2-8 ounces of KC-430 per gallon of water (80°F-140°F). Apply by brush, circulation, pressure spray, or soaking. Allow the product to dwell on surfaces for 10-15 minutes to dissolve soils. Longer contact time, brushing, and/or other mechanical action might be needed for tough soils or large scale build up. Rinse thoroughly with potable water to remove all residue. Before use in meat and poultry food processing plants or dairies, food products and packaging materials must be removed from room or carefully protected.

Prepare fresh KC-430 solution prior to each use. Prepared solution should be used within 24 hours or discarded.
