Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. Seek immediate medical attention/advice.

##### Skin contact

Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Wash contaminated clothing and shoes before reuse. Get medical attention if irritation develops and persists.

##### Inhalation

Remove to fresh air. Administer oxygen if breathing is difficult. Call a physician immediately.

##### Ingestion

Do NOT induce vomiting. Clean mouth with water and drink afterwards plenty of water. Never give anything by mouth to an unconscious person. Call a physician immediately.

#### Most important symptoms and effects, both acute and delayed

##### Methods for containment

Prevent further leakage or spillage if safe to do so.

##### Methods for cleaning up

Dilute with large volume of water and collect into suitable clean container or dike area and hold until the product decomposes. Combustible materials exposed to this product should be immediately submerged in or rinsed with large amounts of water to ensure that all hydrogen peroxide is removed. Following product recovery, flush area with water. Never return unused product to the original container.

### 7. HANDLING AND STORAGE

**Precautions for safe handling****Advice on safe handling**

Never return unused product to the original container. Ensure an adequate supply of water is available in the event of an accident. Use personal protection recommended in Section 8. Avoid contact with skin, eyes or clothing. Use only in well-ventilated areas. Avoid breathing vapors or mists. Wash thoroughly after handling. Handle in accordance with good industrial hygiene and safety practice.

**Conditions for safe storage, including any incompatibilities****Storage Conditions**

Keep containers tightly closed in a cool, well-ventilated place. Keep from freezing. NFPA Class 2 oxidizer. Containers must be vented. Keep at a temperature not exceeding 115°F (46°C). Hydrogen peroxide (Class 2 through Class 4) stored in drums shall not be stored on wooden pallets (NFPA 400, 15.2.12.2). At least one side of each pile of oxidizers shall be on an aisle (NFPA 400, 15.2.12.3).

**Incompatible materials**

Reducing agent. Caustics. May ignite combustibles (wood, paper, oil, clothing, etc.). Contact with metals may evolve flammable hydrogen gas. Organic material. Flammable substances.
