

TECHNICAL DATA

PC-1310

Description:

PC-1310 is a highly effective 10% active industrial grade silicone antifoam emulsion. PC-1310 combines excellent dilution stability with effective defoaming efficiency in a wide range of applications. PC-1310 can be used to suppress and control foam in both hot and cold applications over a wide pH range.

Physical Properties:

Appearance - Opaque, off-white liquid

Odor - Mild

Density - 8.34 pounds per gallon

Dispersibility - Readily dispersible in warm or cold water with mild agitation

Directions for Use:

PC-1310 can be added directly to the foaming system or prediluted in water prior to use. PC-1310 can be diluted with up to equal parts of water to form stable antifoam emulsions. Dilutions greater than 50/50 should be continually stirred to ensure uniformity. Prolonged storage of diluted product is not recommended due to possibility of spoilage.

Safety:

Wash hands thoroughly after handling.

Read Safety Data Sheet (SDS) before using this product.

Storage:

Keep containers closed when not in use. Empty container contains product residue which may exhibit hazards of product. Keep from freezing. Store product between 40-100°F.
