

## TECHNICAL DATA

### PC-1710

#### Description:

PC-1710 is 100% active non-silicone food grade antifoam. PC-1710 has been formulated to meet all requirements under 21 CFR 173.340. This product can be used in food application at levels up to 100 ppm of total system volume. Good manufacturing practices required that only the amount necessary to control the foam be used.

#### Physical Properties:

Appearance - Light yellow opaque liquid

Odor - None

Density - 7.72 pounds per gallon

Viscosity - NAV

Dispersibility - Readily dispersible in warm or cold water with mild agitation

#### Directions for Use:

Start at a usage level of about 50 ppm. Testing will be necessary to see if this level is adequate. More or less PC-1710 may be necessary depending on the severity of the foaming problem. Do not exceed 100 ppm of PC-1710 of total system volume.

#### Safety:

Read Safety Data Sheet (SDS) before using this product.

#### Storage:

PC-1710 is stable under typical storage conditions. To insure product quality, the container should be kept sealed at room temperatures.
