

PC-672 BICARB

GRANULATED FLOOR TREATMENT

WARNING Causes eye irritation. **Prevention:** Wash face, hands and any exposed skin thoroughly after handling. **Response: IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Recommended First Aid: IF ON SKIN (or hair): Remove contaminated clothing. Rinse skin thoroughly with plenty of water. **IF SWALLOWED:** Do not induce vomiting. Have a conscious victim drink water to dilute. Never give anything by mouth to an unconscious person. **IF INHALED:** Remove to fresh air.

Read SDS before using this product.

PC-672 Bicarb is a granulated floor treatment used to prevent slipping on production floors in meat, poultry, dairy and general processing plants. Due to its granulated form, PC-672 Bicarb is less dusting than traditional powdered floor treatments, dissolves slower on wet floor surfaces and offers better anti-slip properties. It contains sodium bicarbonate and cationic quaternary ammonia surfactant which makes it an effective odor control agent in moist environments.

DIRECTIONS FOR USE: Apply in thin layer on food plant flooring, either manually or through the use of a drop spreader. Application rate of 10 pounds per 3750 sq. ft. will deliver an effective level of odor control and prevents slipping of personnel on production floor.
