

# ALX-PRO

## OVERVIEW

The ALX-PRO model offers sanitation managers the highest level system available to control and record chemical consumption. PRO units allow authorized Users to log in with a 4-digit code or RFID card to reliably dispense chemicals via time or weight-based methods. The color screen and stainless steel piezo keypad provide an easy interactive platform, making the dispensing process as smooth as possible.

- ▶ Uses CleanIntel web interface
- ▶ Access codes and authorization Permissions for all Users
- ▶ HID RFID reader
- ▶ Watertight enclosure
- ▶ Scale compatibility
- ▶ Automated email alerts and reports for:
  - Account Managers
  - Plant Personnel
  - Chemical Operators

## FEATURES

### FLEXIBLE AND EXPANDABLE OUTPUTS

Solenoid valve output Devices simply daisy-chain together for plug and play installation and replacement. Available as single 2-way valves or four 3-way valves for controlling large AODD pumps.

### SCALE COMPATIBILITY

The PRO unit is the only allocation system available that is capable of weight-based dispenses alongside the standard time-based methods for ultimate User control.

### ACCESS ANYWHERE

Online administration tools and reports can be accessed from anywhere with an internet signal for increased accountability and flexibility using the CleanIntel web interface.

### USER PERMISSIONS

Access to dispense Application recipes can be limited on a per-user basis in a rolling time period. Individual Users are also able to be blocked from specific Application recipes for greater control over restricted products.

For Example: "User 1" can dispense "Application A" 3 times a day

## OVERVIEW

ALX-PRO units integrate with the CleanIntel website that acts as a centralized location for all reporting and data stored on the system. Its secure connection ensures privacy of all data and allows managers to create new Users, make chemical Application recipes, and edit User Permissions both in the field or on the go.

## SYNC DATA

PRO controllers automatically sync to CleanIntel hourly for constant data connection. Automatic or manual syncing forwards all current data on the unit including Users, Applications, Permissions, Chemicals, and Reports.

## RECORD AND REPORT

Consumption reports and dispense logs track chemical quantities along with the who, what, where, and when for all Users, providing accountability on chemical use. Reports can be scheduled for automatic emails, viewed on CleanIntel, or downloaded as an Excel document.
