

# KC-HYPOFOAM

## FOAM ADDITIVE

CA Reg No. 63679-50002-AA

CA Est. No. 63679-WI-01

### Active Ingredient:

Sodium Lauryl Sulfate .....8.70%  
Sodium Dodecylbenzene Sulfonate.....4.85%

Inert Ingredients.....86.45%

Total .....100.00%

### KEEP OUT OF THE REACH OF CHILDREN

## WARNING

### Hazard Statements:

Causes eye irritation.

### Precautionary Statements:

Wash face, hands, and any exposed skin thoroughly after handling.

### First Aid

**IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

**IF SWALLOWED:** Do NOT induce vomiting. Drink plenty of water. Never give anything by mouth to an unconscious person.

**IF ON SKIN:** Remove contaminated clothing. Rinse skin thoroughly with plenty of water. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

### Storage and Disposal

**Precautions for Safe Handling:** Wear eye protection and neoprene gloves when handling, moving, or using this product.

**Conditions for Safe Storage:** Keep product in tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Protect from freezing

**Method of disposal:** Dispose contents/container in accordance with all applicable federal, state,

provincial and local regulations. Contact your local, state, provincial or federal environmental agency for specific rules.

KC-Hypofoam is a liquid high foaming additive designed for use in conjunction with KC-615 sanitizer and disinfectant. Its long-lasting foam and surfactant package allow for a longer contact time of sanitizing solution on equipment and vertical surfaces than conventional methods. KC-Hypofoam is listed as an approved foaming additive on KC-615 EPA labeling. KC-Hypofoam and KC-615 mixture can also be used to help reduce cross-contamination in entryways.

### DIRECTIONS FOR USE:

**FOAM CLEANING NON-FOOD CONTACT SURFACES:** As an adjunct to cleaning and non-food contact sanitizing procedures KC-615 may be added to KC-HYPOFOAM and foamed on environmental or equipment surfaces using conventional foam-generating equipment. The resultant foam blend can be used on visibly clean equipment, floors, walls, and ceilings and must be left on surface for a minimum of 5 minutes or longer. Directions for mixing: Manually or mechanically blend 6-12 fl. oz. of this product and 3-12 fl. oz. of KC-HYPOFOAM (foam additive) per 10 gallons of water (600-1200 ppm available chlorine by weight). Rinse food contact surfaces with potable water prior to reuse. Note: When using a foam additive, KC-HYPOFOAM is the only approved product that may be used.

**FOAM CLEANING AND SANITIZING FOOD CONTACT SURFACES:** All hard, nonporous food contact surfaces should be precleaned prior to treatment for sanitization. As an adjunct to cleaning and food contact sanitizing procedures KC-615 may be added to KC-HYPOFOAM and foamed on surfaces using conventional foam-generating equipment. The resultant foam blend can be used on precleaned hard, non-porous surfaces of equipment and other food contact surfaces and must be left on surface for a minimum of 2 minutes or longer. Directions for mixing: Manually or mechanically blend 2 fl. oz. of this product and 3-5 fl. oz. of KC-HYPOFOAM (foam additive) per 10 gallons of water (200 ppm available chlorine by weight). Do not rinse equipment with water after treatment. Note: When using a foam additive, KC-HYPOFOAM is the only approved product that may be used.

**ENTRYWAY SANITIZING SYSTEMS:** To help reduce cross-contamination from treated area to treated area, apply (spray) a sanitizing foam to a visibly clean entryway. The foam must cover the entire path of the doorway. Set the system to deliver 6-12 fl. oz. (600-1200 ppm available chlorine by weight) of this product and 3-12 fl. oz. of KC-HYPOFOAM per 10 gallons of water. Adjust the available chlorine concentration by testing the collapsed foam solution using chlorine test kit or test strip. Note: When using a foam additive, KC-HYPOFOAM is the only approved product that may be used.

### Manufactured For:

Safe Foods Chemical Innovations  
1504 E 8<sup>th</sup> Street  
North Little Rock, AR 72114  
Tel. (501) 758-8500

Net Contents:  5 Gallons,  55 Gallons,  275 Gallons

Batch #:

**24 hr. Emergency CHEMTREC Number: 1-800-424-3900**
