Precautionary Stat							
Specific treatment (s							
Immediately call a F							
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.							
Immediately call a POISON CENTER or doctor							
IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/ shower. Wash contaminated clothing							
before reuse. Call a poison center or doctor if you feel unwell							
IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER or doctor							
IF SWALLOWED: Call a POISON CENTER or doctor if you feel unwell. Rinse mouth. Do NOT induce vomiting							
Precautionary Stat	ements - Storage						

Store locked up

Precautionary Statements - Disposal Dispose of contents/container to an approved waste disposal plant Hazards not otherwise classified (HNOC)

Not applicable Other Information

Harmful to aquatic life with long lasting effects

Indication of any immediate medical attention and special treatment needed Note to physicians Treat symptomatically. Suitable extinguishing media Dry chemical. Water spray (fog). Carbon dioxide (CO2). Foam. Unsuitable extinguishing media Dry chemicals medical attention gas which can form explosive mixtures with air. Exothermic reaction will occur upon dilution with water. Hazardous combustion products Sensitivity to Static Discharge None. Protective equipment and precautions for firefighters As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full produce corrosive and/or toxic fures. <b>6. ACCIDENTAL RELEASE MEASURES</b>	3. (	COMPOSITIO	N/INFORMATION ON INGREDI	ENTS			
Sodium carbonate         7647-14-5         0-2           Sodium carbonate         497-19-8         0-2           *The exact percentage (concentration) of composition has been withheld as a trade secret.         0-2           *Instaid measures         4. FIRST AID MEASURES           Eye contact         Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove conta lenses, if present, after first 5 minutes, then continue rinsing eye. Seek immediate media attention/advice.           Skin contact         Wash off immediately with soap and plenty of water while removing all contaminated clothing and shoes before reuse. For severe bu immediate medical attention is required. Do not use solvents or thinners.           Inhalation         Remove to fresh air. Administer oxygen if breathing is difficult. Call a physician immediately. Most important symptoms and effects, both acute and delayed           Symptoms         See Section 11 for symptom information.           Indication of any immediate medical attention and special treatment needed           Note to physicians         Treat symptomatically.           Suitable extinguishing media         Do not use water jet as an extinguisher, as this will spread the fire.           Specific hazards arising from the chemical         Produce toxic and/or corrosive substances on contact with water.           Hazardous combustion products         Produce toxic and/or corrosive substances on contact with water. Remove conta lenses, if present, after first 5 minutes, then continue rinsing eye. Seek immediate media attention/advice.           Skin contact         Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Wash contaminated clothing and shoes before reuse. For severe bu immediate medical attention is required. Do not use solvents or thinners.           Inhalation         Remove to fresh air. Administer oxygen if breathing is difficult. Call a physician immediately solvents or thinners.           Most important symptoms and effects. both acute and delayed         See Section 11 for symptom information.           Indication of any immediate medical attention and special treatment needed         Do not use water jet as an extinguisher, as this will spread the fire.           Specific hazards arising from the chemical         Do not use water jet as an extinguisher, as this will spread the fire.           Specific hazards arising from the chemical         Produce toxic and/or corrosive substances on contact with water.           Explosion data         Sensitivity to Mechanical Impact         None.           Specific hazards arising from the chemical         None.         Produce toxic and/or corrosive substances on contact with water. </td <td>Sodium Hydroxide</td> <td></td> <td>1310-73-2</td> <td>96-100</td>	Sodium Hydroxide		1310-73-2	96-100			
*The exact percentage (concentration) of composition has been withheld as a trade secret.  4. FIRST AID MEASURES  First aid measures Eye contact Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove conta lenses, if present, after first 5 minutes, then continue rinsing eye. Seek immediate medi attention/advice. Skin contact Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Wash contaminated clothing and shoes before reuse. For severe bu immediate medical attention is required. Do not use solvents or thinners. Inhalation Remove to fresh air. Administer oxygen if breathing is difficult. Call a physician immedia Byestion Never give anything by mouth to an unconscious person. Call a physician immediately. Most important symptoms and effects, both acute and delayed Symptoms See Section 11 for symptom information. Indication of any immediate medical attention and special treatment needed Note to physicians Treat symptomatically.  5. FIRE-FIGHTING MEASURES Suitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire. Specific hazards arising from the chemical Attacks many metals producing extremely flammable hydrogen gas which can form explosive mixtures with air. Exothermic reaction will occur upon dilution with water. Hazardous combustion products Explosion data Sensitivity to Mechanical Impact None. Protective equipment and precautions for firefighters As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear. Cool containers with flooding quantities of water until well after fire is out. Non-combustible, substance itself dc not burn but may decompose upon heating to produce corrosive and/or toxic furnes. (6. ACCIDENTAL RELEASE MEASURES	Sodium chloride		7647-14-5	0-2			
4. FIRST AID MEASURES           First aid measures           Eye contact           Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove conta lenses, if present, after first 5 minutes, then continue rinsing eye. Seek immediate medi attention/advice.           Skin contact         Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Wash contaminated clothing and shoes before reuse. For severe bu immediate medical attention is required. Do not use solvents or thinners. Remove to fresh air. Administer oxygen if breathing is difficult. Call a physician immediately. Nost important symptoms and effects, both acute and delayed Symptoms           See Section 11 for symptom information. Indication of any immediate medical attention and special treatment needed Note to physicians           Treat symptomatically.           Suitable extinguishing media Dry chemical. Water spray (fog). Carbon dioxide (CO2). Foam. Unsuitable extinguishing media Dry chemical. Water spray (fog). Carbon dioxide (CO2). Foam. Unsuitable extinguishing media Dry chemical. Water spray (fog). Carbon dioxide (CO2). Foam. Unsuitable extinguishing media Dry chemical. Water spray (fog). Carbon dioxide (CO2). Foam. Unsuitable extinguishing media Dry chemical. Water spray (fog). Carbon dioxide (CO2). Foam. Unsuitable extinguishing from the chemical Attacks many metals producing extremely flammable hydrogen gas which can form explosive mixtures with air. Exothermic reaction will occur upon dilution with water. Explosion data Sensitivity to Mechanical Impact None. Sensitivity to Mechanical Impact None. Sensitivity to Mechanical Impact None. Sensitivity to Mechanical Impact None. Sensitivity to Mechanical Sof friefighters As in any fire, wear self-contained breathing apparat	Sodium carbonate 497-19-8 0-2						
First aid measures         Eye contact       Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove conta lenses, if present, after first 5 minutes, then continue rinsing eye. Seek immediate media attention/advice.         Skin contact       Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Wash contaminated clothing and shoes before reuse. For severe bu immediate medical attention is required. Do not use solvents or thinners.         Inhalation       Remove to fresh air. Administer oxygen if breathing is difficult. Call a physician immediate medical attention is required. Do not use solvents or thinners.         Most important symptoms and effects, both acute and delayed       Never give anything by mouth to an unconscious person. Call a physician immediately.         Most important symptoms and effects, both acute and delayed       Symptoms         Symptoms       See Section 11 for symptom information.         Indication of any immediate medical attention is prequired. Note to physicians       Treat symptomatically.         Suitable extinguishing media       Do not use water jet as an extinguisher, as this will spread the fire.         Specific hazards arising from the chemical       Attacks many metals producing extremely flarmable hydrogen gas which can form explosive mixtures with air. Exothermic reaction will occur upon dilution with water.         Hazardous combustion products       Produce toxic and/or corrosive substances on contact with water.         Explosion data       Sensitivity to Mechanical Impact <td< td=""><td>*The exact perc</td><td>entage (concent</td><td>ration) of composition has been withhele</td><td>d as a trade secret.</td></td<>	*The exact perc	entage (concent	ration) of composition has been withhele	d as a trade secret.			
Eye contact       Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contal lenses, if present, after first 5 minutes, then continue rinsing eye. Seek immediate media attention/advice.         Skin contact       Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Wash contaminated clothing and shoes before reuse. For severe buit mediate medical attention is required. Do not use solvents or thinners.         Inhalation       Remove to fresh air. Administer oxygen if breathing is difficult. Call a physician immedia Ingestion         Do NOT induce vomiting. Rinse mouth immediately and drink plenty of water afterwards. Never give anything by mouth to an unconsocious person. Call a physician immediately.         Most important symptoms and effects, both acute and delayed         Symptoms       See Section 11 for symptom information.         Indication of any immediate medical attention and special treatment needed         Note to physicians       Treat symptomatically.         Suitable extinguishing media       Do not use water jet as an extinguisher, as this will spread the fire.         Specific hazards arising from the chemical       Produce toxic and/or corrosive substances on contact with water.         Hazardous combustion products       Produce toxic and/or corrosive substances on contact with water.         Explosion data       Sensitivity to Mechanical Impact         Sensitivity to Mechanical Impact       None.         Sensitivity to Mechanical Impact       None.		4.	FIRST AID MEASURES				
Ienses, if present, after first 5 minutes, then continue rinsing eye. Seek immediate media attention/advice. Skin contact Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Wash contaminated clothing and shoes before reuse. For severe buinmediate medical attention is required. Do not use solvents or thinners. Inhalation Remove to fresh air. Administer oxygen if breathing is difficult. Call a physician immediate Do NOT induce vomiting. Rinse mouth immediately and drink plenty of water afterwards Never give anything by mouth to an unconscious person. Call a physician immediately. Most important symptoms and effects, both acute and delayed Symptoms See Section 11 for symptom information. Indication of any immediate medical attention and special treatment needed Note to physicians Treat symptomatically. <b>5. FIRE-FIGHTING MEASURES</b> Suitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire. Specific hazards arising from the chemical Attacks many metals producing extremely flammable hydrogen gas which can form explosive mixtures with air. Exothermic reaction will occur upon dilution with water. Hazardous combustion products Produce toxic and/or corrosive substances on contact with water. Explosion data Sensitivity to Mechanical Impact None. Sensitivity to Static Discharge None. Protective equipment and precautions for firefighters As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear. Cool containers with flooding quantities of water until well after fire is out. Non-combustible, substance itself do not burn but may decompose upon heating to produce corrosive and/or toxic furmes. <b>6. ACCIDENTAL RELEASE MEASURES</b>							
clothes and shoes. Wash contaminated clothing and shoes before reuse. For severe buinmediate medical attention is required. Do not use solvents or thinners.         Inhalation       Remove to fresh air. Administer oxygen if breathing is difficult. Call a physician immediate Do NOT induce vomiting. Rinse mouth immediately and drink plenty of water afterwards. Never give anything by mouth to an unconscious person. Call a physician immediately.         Most important symptoms and effects, both acute and delayed       Symptoms         Symptoms       See Section 11 for symptom information.         Indication of any immediate medical attention and special treatment needed         Note to physicians       Treat symptomatically.         Suitable extinguishing media       Do not use water jet as an extinguisher, as this will spread the fire.         Specific hazards arising from the chemical       Do not use water jet as an extinguisher, as this will spread the fire.         Attacks many metals producing extremely flammable hydrogen gas which can form explosive mixtures with air. Exothermic reaction will occur upon dilution with water.       Hazardous combustion products         Hazardous combustion products       Produce toxic and/or corrosive substances on contact with water.         Explosion data       Sensitivity to Mechanical Impact       None.         Sensitivity to Static Discharge       None.       Sensitivity of appratus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear. Cool containers with flooding quantities of water until well after fire is out. Non-combustible,	lenses, if present, after first 5 minutes, then continue rinsing eye. Seek immediate medica attention/advice.						
Ingestion       Do NOT induce vomiting. Rinse mouth immediately and drink plenty of water afterwards Never give anything by mouth to an unconscious person. Call a physician immediately.         Most important symptoms and effects, both acute and delayed         Symptoms       See Section 11 for symptom information.         Indication of any immediate medical attention and special treatment needed         Note to physicians       Treat symptomatically.         Suitable extinguishing media       Do not use water jet as an extinguisher, as this will spread the fire.         Specific hazards arising from the chemical       Attacks many metals producing extremely flammable hydrogen gas which can form explosive mixtures with air. Exothermic reaction will occur upon dilution with water.         Hazardous combustion products       Produce toxic and/or corrosive substances on contact with water.         Explosion data       None.         Sensitivity to Mechanical Impact       None. Methods and material for containment and cleaning up	Methods and material for contain						
Methods for containment         Prevent further leakage or spillage if safe to do so.							
Methods for cleaning up Isolate spill or leak area immediately. Stay upwind. Do not touch or walk through spilled material. Collect spillage. Shovel dry material into suitable container. Remainder may b neutralized with a mild acid (vinegar) and rinsed to a sewer.							
7. HANDLING AND STORAGE							

Precautions for safe handling

# SODIUM HYDROXIDE FLAKES

Advice on safe handling	only add caustic soda slov on soft metals, galvanized Section 8. Avoid contact v	Exothermic reaction will occur upon dilution with water. When making solutions or diluting, only add caustic soda slowly to surface of cold water while stirring. This product is not safe on soft metals, galvanized and painted surfaces. Use personal protection recommended in Section 8. Avoid contact with skin, eyes or clothing. Use only in well-ventilated areas. Avoid breathing dust, vapors, or mist. Wash thoroughly after handling. Handle in accordance with good industrial bygiene and safety practice.					
Conditions for safe storage, inc							
Storage Conditions Keep containers tightly closed in a dry, cool and well-ventilated place. Keep in prop							
Storage Conditions Keep containers tightly closed in a dry, cool and well-ventilated place. Keep in pro labeled containers. Do not store in aluminum containers or use aluminum fittings of lines, as flammable hydrogen gas may be generated. Do not allow water to get int container. Keep separated from incompatible substances.							
Incompatible materials		ns. Amphoteric metals (aluminum,	copper. zinc).

No data available

#### Chemical stability

Stable under recommended storage conditions. Exothermic reaction will occur upon dilution with water.

#### Possibility of Hazardous Reactions

None under normal processing.

#### Conditions to avoid

This product is not safe on soft metals, galvanized and painted surfaces. Keep from any possible contact with water. Exothermic reaction will occur upon dilution with water. Dust formation.

### Incompatible materials

Acids. Oxidizers. Halogens. Amphoteric metals (aluminum, copper, zinc).

### Hazardous Decomposition Products

Hazardous Decomposition products formed under fire conditions – Sodium oxides.

<u>Disclaimer</u> The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The health hazards given on this SDS apply to this product in its concentrated form (as supplied) and may differ significantly at use dilution. The signs and symptoms of exposure apply only to negligence in handling or misuse of the concentrated product and not to the routine exposure of the diluted product under conditions of ordinary use.
