Christine Donohue, MPH, PhD  
Senior Managing Consultant  
**Ramboll**  
Email: [cdonohue@ramboll.com](mailto:cdonohue@ramboll.com)

Dear Dr. Donohue:

**RE: CC-610**

This is in response to your letter of June 6, 2023, wherein you notified us regarding a legal change to your client's company name from Packers Chemical, Inc. to Safe Foods Chemical Innovations and requested an updated letter of no objection for the subject product to be used as a sanitizer in Federally Registered Food Establishment.

Based on the information submitted, we can advise that we see no reason to object to the composition and use of the subject sanitizer on food contact surfaces in food processing establishments without a potable water rinse after treatment, provided that:

- a) the food contact surfaces have been previously cleaned and rinsed with potable water prior to sanitizing;
- b) the concentration of peracetic acid will not exceed 500 ppm, as stated on the label;
- c) the surfaces are hard and non-porous in nature and are thoroughly drained prior to re-use; and
- d) prior to application (spraying) of the product in food handling areas, all food as well as any surfaces, which directly contact food, should either be removed from the vicinity or otherwise protected from the spray.

We trust that the foregoing will be of use to you.

Yours truly,

X 

---
