Christine Donohue, MPH, PhD
Senior Managing Consultant
Ramboll
Email: cdonohue@ramboll.com

Dear Dr. Donohue:

RE: CC-632

This is in response to your letter of June 6, 2023, wherein you notified us regarding a legal change to your client's company name from Packers Chemical, Inc. to Safe Foods Chemical Innovations and requested an updated letter of no objection for the subject product to be used as a sanitizer without a potable water rinse in Federally Registered Food Establishment..

Based on the information submitted, we can advise that we see no reason to object to the composition and use of the subject product to sanitize food contact equipment or surfaces in food plants without a potable water rinse provided that:

- a) the food contact surfaces have been previously cleaned and rinsed with potable water prior to its use;
- b) the use concentration of the product will not exceed **200 ppm of active quaternary ammonium compounds**; and
- c) the surfaces are **hard** and **non-porous** in nature and are thoroughly drained prior to re-use.

We would also have no objection to the use of the subject product to clean and to disinfect food contact surfaces and equipment at **450 ppm** of quaternary ammonium compound in food plants provided that:

- a) there will be no contamination of food as a result of its use; and

- b) equipment and surfaces subject to direct contact with food are thoroughly rinsed with potable water after treatment with the product.

We trust that the foregoing will be of use to you.

Yours truly,

X *Cynthia Scholten*
