Christine Donohue, MPH, PhD
Senior Managing Consultant
Ramboll
Email: cdonohue@ramboll.com

Dear Dr. Donohue:

RE: CC-633

This is in response to your letter of June 6, 2023, wherein you notified us regarding a legal change to your client's company name from Packers Chemical, Inc. to Safe Foods Chemical Innovations and requested an updated letter of no objection for the subject product to be used as a disinfectant in Federally Registered Food Establishment..

Based on the information submitted, we can advise that we see no reason to object to the composition and use of the subject **disinfectant on food contact surfaces** in food plants without a potable water rinse provided that:

- a) the food contact surfaces have been previously cleaned and rinsed with potable water prior to sanitizing;
- b) the use concentration of the product will **not exceed 200 ppm of active quaternary ammonium compounds**;
- c) the surfaces are hard and non-porous in nature and are thoroughly drained prior to re-use; and
- d) prior to application of the product in food handling areas, all food should either be removed from the vicinity or otherwise protected.

Please note that this opinion is applicable to the acceptability of this product from a food chemical safety perspective only under the authority of the provisions of Section 4(1)(a) of the *Food and Drugs Act*, and is not a validation of product efficacy. It does not exempt this product and its constituent substances from any legal requirements as a drug or natural health product or from

other reporting requirements related to manufacture, or import, if applicable. It is your responsibility to ensure that this product complies with all legal requirements relevant to its use.

We trust that the foregoing will be of use to you.

Yours truly,

X
