

TECHNICAL DATA

PAC-403

ORGANIC ACID FP

Description:

PAC-403 Organic Acid FP is a non-foaming, phosphate-free acid cleaner for removing alkali scale and buildup from metal surfaces of meat and offal processing equipment. PAC-403 Organic Acid FP is formulated with a blend of biodegradable organic acids. It may be used on equipment, walls, and floors and in all departments of meat, poultry and general food processing plants.

Directions for Use:

Rinse area to be cleaned with hot water (40°C - 60°C) to remove gross soil. Use 20 – 80 mL PAC-403 Organic Acid FP / Litre of hot water (40°C - 60°C). Apply directly to surfaces by spraying or brushing. Allow 10 minutes contact time to remove scale. Repeat if necessary.

Contains:

Hydroxyacetic acid and citric acid.

FOR FOOD PLANT & INDUSTRIAL USE ONLY
