**Canadian Letter of Guaranty  
Antimicrobial Product for Use in Food Processing Establishments**

Sterilex Ultra Step is an antimicrobial product that is effective for cleaning and sanitization of food processing establishments. This product can be used on hard, non-porous surfaces, including floors and drains, in and around CFIA inspected food processing establishments. This product is not approved for use on food contact surfaces. Ensure the use or storage of this product does not result in the contamination of food. This product must always be used in accordance with the directions and warnings outlined on the product label.

If requested by the Canadian Food Inspection Agency (CFIA), Sterilex shall provide documentation to demonstrate that this product is suitable for labelled uses in food processing establishments.

Sincerely,

John Reilly  
Manager of Regulatory Affairs  
Sterilex

*This letter is to be used exclusively for Sterilex products. Please contact your Sterilex representative for inquiries and letter of guaranty requests.*
