FOOD PROCESSING AID

Cecure® is an antimicrobial for direct application to food products comprised of cetylpyridinium chloride (CPC) in propylene glycol and water. Cecure® has been demonstrated to be effective on various foods such as poultry, beef, pork, seafood, fruits, vegetables, and ready-to-eat meat products. It is currently approved by the U.S. FDA and USDA (and various other jurisdictional agencies outside the U.S.) as an antimicrobial food processing aid for poultry carcass and parts applications, and its clearance for use on certain other food products is pending.

INGREDIENTS:

Cetylpyridinium chloride.....CAS Registry No.6004-24-6 Propylene glycol.......CAS Registry No.57-55-6

DIRECTIONS FOR USE: Concentrated - Solution (40% CPC) should be diluted at least 40:1 before application. Application must be followed by potable water rinse. Contents must be at 65°F or above before use.

DO NOT REFRIGERATE.

No warranty express or implied, of merchantability, fitness for a particular purpose or otherwise, is made except that the product conforms to Safe Foods Chemical Innovations specifications. Buyer assumes all risk of use, storage and handling. Safe Foods Chemical Innovations shall not be liable for any incidental or consequential damages arising directly or indirectly in connection with the purchase, use, storage or handling of the product. To be used only by qualified personnel. This container may be hazardous when emptied. Since empty container contains product residues (vapor or liquid) all label hazard precautions must be obeyed. Dispose in accordance with Local, State and Federal regulations. Do not reuse empty containers.
