

Peracetic Acid

ANTIMICROBIAL

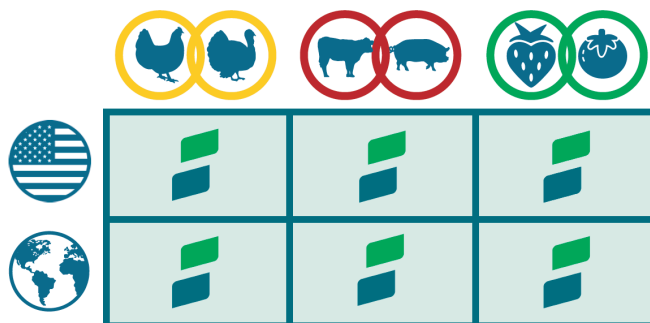

PROMOAT FOOD SAFETY IN YOUR PLANT

Promoat is an incredibly versatile direct food contact antimicrobial that can be used at almost any intervention point in the plant. Studies have shown that Promoat's blend is more effective and stable than many other PAA formulations on the market today. When combined with the Safe Foods Entro delivery module and MARC System, Promoat concentration can be monitored and adjusted in real-time, ensuring optimum antimicrobial performance.

Key Benefits

-  Approved by FDA, USDA, Health Canada and others
-  Real-time control with MARC
-  Pathogen kill through oxidation
-  Extends product shelf life
-  Broad Spectrum efficacy
-  Approved for organic processing
