## SHACKLE AND CONVEYOR LUBRICANT

PC-996 CL is a mineral oil, fatty acid, and fatty acid soap based shackle and conveyor lubricant for use in a variety of meat, poultry and other food processing environments. PC-996 CL protects bearing surfaces of conveyors against excessive wear and assures smooth operation. Meets USDA H-1 requirements allowing for incidental food contact.

**DIRECTION FOR USE:** PC-996 CL creates stable emulsion when mixed with water, allowing application of a thin, uniform lubricant layer onto the surfaces to eliminate dripping. Dilute with water as needed up to 1 part of PC-996 CL per 9 parts of water. Dilution depends on the level of lubrication required and individual system requirements. For more information, contact your Safe Foods Chemical Innovations' Representative.

**ADDITIONAL PRECAUTIONS:** This product may combust at high temperatures. Avoid water contamination to minimize product degradation. Keep container closed. Avoid contact of this product with strong oxidizing agents. Do not store at temperatures above 120°F or in direct sunlight for extended periods of time.
