

# VORCLONE™

Scalder Filtration System

The Vorclone is a non-chemical intervention designed to filter and clean scalders, producing significant impacts on decreasing microbiology in processing plants. Vorclone improves turbidity in scalder units by removing dirt, fecal matter, solids, and heavy liquids. Reducing the organic loading in scalders decreases hot rehang microbiology while simultaneously cleaning the unit to reduce sanitation labor. Vorclone's impressively simple design is low maintenance and easy to install.

## KEY BENEFITS

- ▶ Significant decrease in hot rehang microbiology
- ▶ Reduce cost of sanitation labor with cleaner scalders
- ▶ Reduce organic loading in scalder
- ▶ Low maintenance, easy to clean
- ▶ Improve turbidity in scalder
- ▶ Easy to install

## ABOUT SAFE FOODS CHEMICAL INNOVATIONS

Safe Foods Chemical Innovations, a division of PSSI Food Safety Solutions, is your premier partner for superior chemical solutions, intervention processing aids, and innovative equipment. PSSI offers comprehensive sanitation services, chemical products, pest management, and intervention solutions for food processing facilities. Its team of skilled food sanitors, microbiologists, technical experts and engineers are committed to keeping USDA, FDA, and CFIA processing facilities clean, safe, and audit-ready. PSSI works with each partner to develop smarter and more efficient food safety programs for total protection.
